### DETAILED ACTION

1. Claims 31-51 are presented for examination.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 31, 32, 39, 45, 47, 51 are rejected under 35 U.S.C. 102(b) as being anticipated by Aronson.

With respect to claim 31, Aronson teaches the claimed obtaining a request at page, forwarding, obtaining user input, executing an internal application to process the user input to generate a second document and forwarding the second document to the client computer, at pages 44-49 as forms. Assembling using at least one object having a persistence level is taught at pages 120-121 as Persistent HTTP cookies.

Claim 32 further requires dynamic generation. At page 44 "processed in real time and a custom reply can be generated".

Art Unit: 2671.

Claim 39 requires a plurality of control objects. Aronson teaches radio buttons at page 47.

Claim 45 is similar to claim 31 and is rejected under similar rationale.

Claim 47 requires a persistence level. Aronson teaches this at pages 120-121 as Persistent HTTP cookies.

Claim 51 is similar to claim 31 and is rejected under similar rationale.

4. Claims 33-38, 40-44, 46, 48-50 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Almis R Jankus whose telephone number is 703-305-9795. The examiner can normally be reached on M-F, 8-5.
